PROFESSIONAL SUMMARY

Software Engineer (Apprentice) with 11+ months of production experience building and supporting an enterprise SaaS platform in C#, ASP.NET, React, TypeScript and SQL (MSSQL, MySQL), with a prior background in Java and Spring Boot. Works on the Run-The-Business (RTB) team for Diligent's TPM (Third Party Management) product: owning client-reported bugs from triage and root-cause analysis through QA sign-off and production release, and delivering product enhancements alongside Product, QA, SRE and Support.

EXPERIENCE

Software Engineer (Apprentice) | Diligent Nov 2025 – Present

RTB Team • TPM (Third Party Management), enterprise third-party risk management SaaS used by global organisations

- Own client-reported issues across a 5-stage RTB cycle (triage, root-cause analysis, code fix, QA sign-off, production release) for 11+ months on a production enterprise platform, writing each fix against clear acceptance criteria.
- Deliver fixes and enhancements across a 5-technology stack (C#, ASP.NET, React, TypeScript, SQL) and 2 database engines (MSSQL, MySQL).
- Triage client-side and server-side defects independently with browser DevTools and application logs, cutting dependence on senior escalation.
- Collaborate daily with 4 cross-functional teams (Product, QA, SRE, Support) in an agile setup; take part in sprint planning, standups and retrospectives.

Web Developer Intern | KPTCL (Karnataka Power Transmission Corp. Ltd.) 2023

- Built responsive UIs with HTML5, CSS3 and Bootstrap, improving usability for 100+ daily users.
- Resolved 5+ front-end issues by troubleshooting bugs and optimising web components; managed code with Git alongside cross-functional teams.

PROJECTS

SunSeat – Travel-Planning PWA • React, TypeScript, Vite, Tailwind CSS

- Built a progressive web app that recommends which side of a vehicle to sit on to avoid or catch the sun, based on route and sun position.
- Integrated 3 external services (suncalc for sun position, Nominatim for geocoding, OSRM for routing); added a sun-compass visual, Google Maps deep link, WhatsApp sharing and a PWA install prompt.

Netflix Clone • Java, Spring Boot, HTML, CSS, REST API

- Built a streaming web app with registration, login, profiles, movie listings and video playback; Spring Boot REST APIs with a JavaScript front end and localStorage-based session handling.

Event Management System • JSP, Servlets, JDBC, MySQL

- Built a platform to create, browse and join events, with email notifications via JEE Servlets and confirmation popups on registration.

Food Delivery Website • JSP, JDBC, MySQL

- Built a responsive ordering app with menu browsing, cart management, user authentication and order processing backed by MySQL.

SKILLS

Languages: C#, Java, JavaScript, TypeScript, SQL
Frameworks & Libraries: ASP.NET, React, Spring Boot, Hibernate, Bootstrap, Tailwind CSS
Databases: MSSQL, MySQL
Tools & Platforms: Git, GitHub, Browser DevTools, Cursor
Web: HTML5, CSS3, REST APIs, PWA, JSP, JEE Servlets, JDBC
CS Fundamentals: Data Structures, Algorithms, OOP, SOLID Principles

EDUCATION

B.E. Information Science and Engineering | Sai Vidya Institute of Technology (CGPA 7.53/10) 2020 – 2024
Pre-University Course | Narayana Junior College (CGPA 8.23/10) 2018 – 2020
Class X | Balayesu Vidyalaya High School (CGPA 9.7/10) 2015 – 2018

CERTIFICATIONS

Java – Full Stack Web Development (Tap Academy) • Java (Basic), MySQL and Problem Solving (HackerRank)
